

HOW TO START INVESTING IN DIGITAL ASSETS (CRYPTO)

Super Satang

Week 2

What is crypto?

Cryptocurrency is a virtual currency which uses cryptography to encrypt, making it impossible to counterfeit

It uses blockchain technology – this is a ledger (a record of money transactions) that lies on a network of computers

It is “decentralised” meaning no one can control it including the government

It allows for cheaper and faster transactions

Available exchanges in Thailand

Bitkub – leading crypto exchange in Thailand (funded by SCBx)

Zipmex – crypto exchange that offers additional interest

Metamask (wallet)

Satang Pro

Why crypto/digital assets?

- The supply is not controlled by the government and there is a limit. This makes sure it has long term value
- It is a hedge against fiat (money) which is controlled by the government and protects against inflation
- It is the first alternative in the history of money! But is it good or is it bad?

Well-known coins

Bitcoin – the first coin (Market cap – \$827 billion)

Ethereum – NFTs run on this ecosystem (\$348 billion)

Cardano – competitor to Ethereum (\$32 billion)

Solana – emphasises speed cost and effectiveness (\$31 billion)

Sandbox – key behind the metaverse project (\$3 billion)

USD stable coins – relative to the price of US dollar (\$53 billion)

Fiat VS Crypto

Fiat Sytem

- Banks
- Payments
- Cash
- FinTechs

Blockchain

- Bitkub
- Opensea
- Zipmex
- Metamask

Bridges between the system – Interoperability

Handy Terminology

- Altcoin – any coin other than bitcoin (the original)
- Gas – cost of transactions between platforms
- Rug pull – a scam
- Wallet – an app or hardware used to store cryptocurrencies

- Any more you know?

How to set up a Bitkub account

- Enter email address and create a strong password (make sure to set up 2 Factor Authentication)

SUBSCRIBE

  

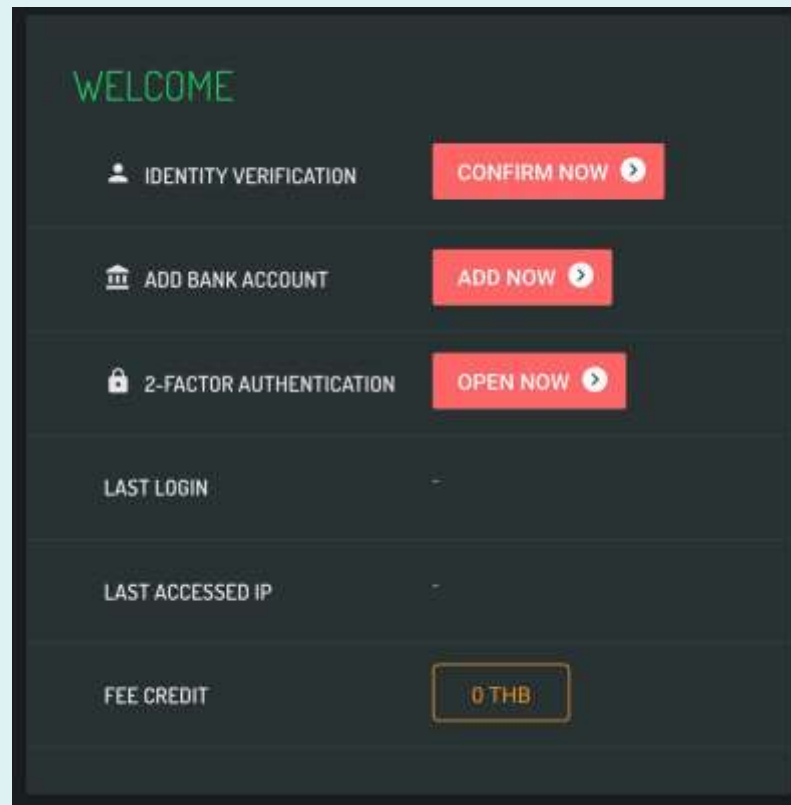

Obtained a business license from the Ministry of Finance under the supervision of the SEC Office

How to set up a Bitkub account

- Complete the KYC process (identity verification) – please ask for parental permission

How to set up a Bitkub account

- Click on the level you desire (Usually level 1)

AUTHENTICATION STATUS: **LEVEL 0**
⚠ Please verify your identity level 1 to initiate transactions.

Some tips

- You never know where the top or bottom is so...

Averaging is key

Suppose you want to buy 100,000 worth of ETH

You should buy 10,000 over 10 days just incase the price goes lower so you can buy it cheaper

Do the same when selling

Always research before buying!! – we will talk about this in later sessions

Thank You
