

Combating Inflation

Super Satang

Week 2 2022/23

Inflation

“a general increase in prices and fall in the purchasing value of money”

7.7%

8.5%

What do you want when there is inflation?

Save money for the future

Spend and invest most of it

Invest all!

During Inflation...

“Sweet spot”

Saving
all

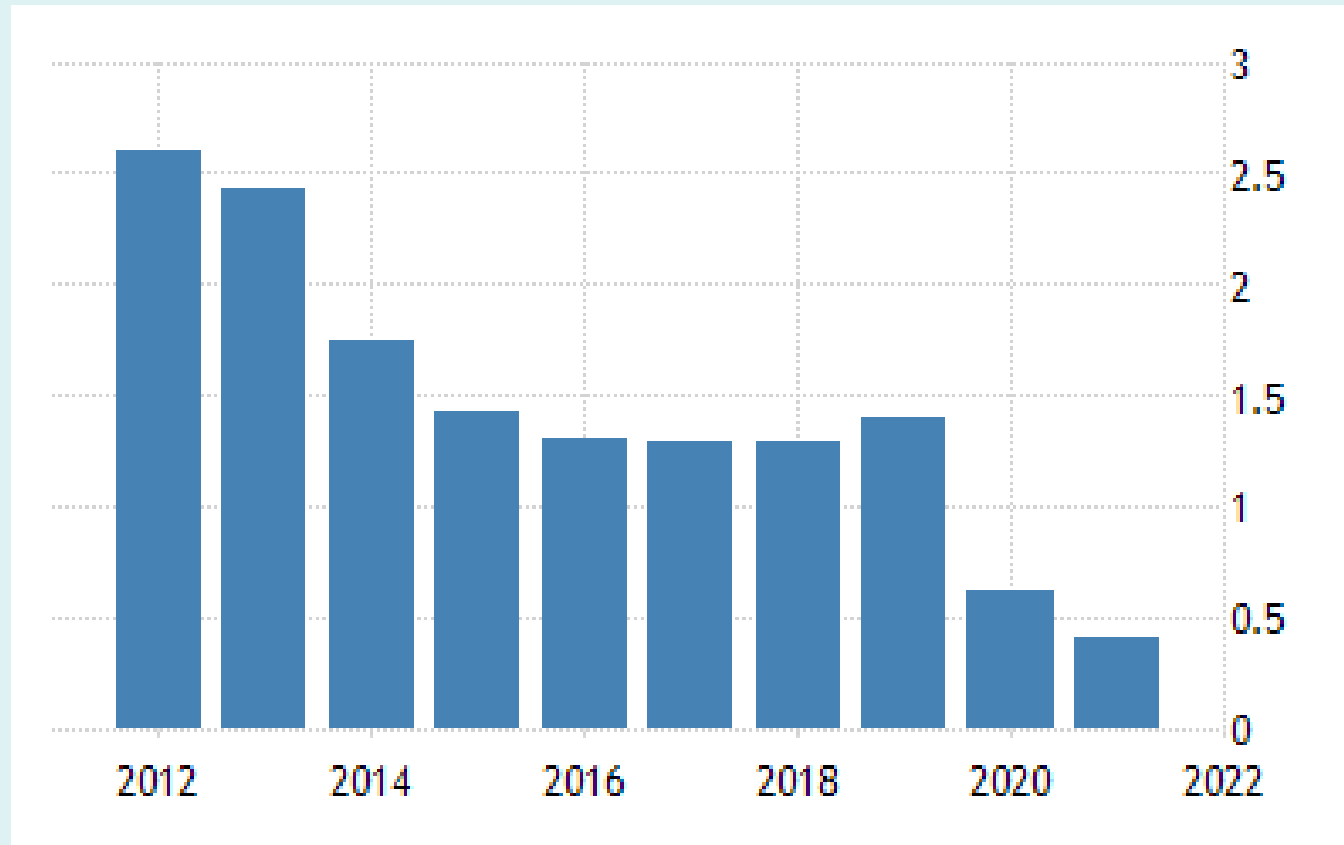

Investing + spending
all

Increase in assets \geq Inflation
rate

Savings account interest rate in Thailand

...Which is obviously less than the inflation rate meaning the REAL value drops

Leaving your money in your account
LOSES value...

“Let your money work for you”

Investing habits now vs the future

Now

Investing
> 90%

The
future

Investing and
saving equally

Why?

How...

- Mutual funds – how to look for the right one?
- Stocks* – recommend Etoro
- Real Estate – you do not need to buy a whole property!
- Bonds
- Crypto
- Commodities – Gold!

Our age determines how we
should invest

Important note

Super Satang @ CAS/CAT fair this Friday!!!

Board member meeting on Wednesday
